# SkiMotion

## Make every run count

Combining video and ski-boot sensor data
for technique review and instruction

# Combining video and motion data

SkiMotion

**Ski-boot sensors**

Tilt angle and acceleration in turns

**Skiing video**

Full-body movement and posture

**Dynamic 3D reconstruction and joint analysis with AI**

## Skiers

Understand movement and get clear feedback

## Instructors

Review and explain runs, track progress

## Ski resorts

Save and share runs, broaden resort services

# Product experience video

# Your experience and insights

SkiMotion

## Product and market

**01** **What similar products or technologies have you seen or used?**

If you've used any, which features did you like?
What could be improved?
If not, based on the video, would you buy this product for your own use?

**02** **Which European country would you recommend for a pilot project?**

What are your main reasons?

**03** **Which customer groups are most willing to pay for ski instruction?**

Which skiing skills do they usually want to improve?

## Teaching and instructors

**04** **Do instructors currently use video in their teaching?**

If so, when do they typically use it?

**05** **Do instructors need to adapt their teaching to each student?**

What differences between students do they take into account?

**06** **Do instructors worry about being replaced by AI?**

If so, what concerns have you observed?

# Thank you for your time

Your experience will help us assess product value
and guide our pilot plans
